INDIANA QSO PARTY

Saturday, May 5th, the Indiana QSO Party runs from 11:00 am to 11:00 pm EDT. We (FWRC) are still hopeful we can find a venue to allow us to run a Multi-Multi entry. Ideally, we would like to have 4 stations, two on CW and two on SSB. Anyone interested in participating in the event on the W9TE team, please contact Steve, W9SAN, at w9san@yahoo.com.

If you can't join us, but can work the INQP from home, work as many as you can, and when submitting your log, please list Fort Wayne Radio Club as your club affiliation in your log submittal.

73, Steve, W9SAN

FWRC AUCTION FOR SILENT KEYS AND OTHERS

You've probably heard through the repeater grapevine that the club is working on multiple estates to auction to benefit the families. **The current plan is to start the auction on line the day after the May Fox Hunt, May 7th, and the auction will run for 3 weeks.** On line software will record the bids and keep a running highest bid.

The auction will include the following;

- 1.) equipment donated to the club
- 2.) A local SK
- 3.) A local ham who is no longer able to use his station

4.) SK estate of a New Jersey ham

5.) more donated equipment

The equipment includes a full range of ham gear, from HF transceivers, VHF/UHF transceivers, antennas, analyzers, power/SWR bridges, scanners, and even some homebrew equipment. Two towers are included (we'll need help taking these down!). Pictures of all the items will be included on the FWRC website. This is going to blow your mind!!

73, Steve, W9SAN

AMATEUR RADIO LICENSE EXAMS PLANNED MAY 5

Volunteer examiners will offer amateur radio license examinations in Fort Wayne May 5. They will conduct the exams at the offices of the Boy Scouts of America Anthony Wayne Area Council, 8315 West Jefferson Blvd.

Despite the West Jefferson address, the office is accessed by taking the access road across from the entrance to Lutheran Hospital. The Boy Scout office is at the south end of that access road, just beyond Extended Stay America. The examiners will be in the basement, next to the Kitchen.

They will offer exams for all classes of amateur radio licenses. No appointment is necessary. Persons wishing to take exams may check in from 9 to 11 a.m. They will need \$14 for the exam fee, a photo ID and a second form of ID. Amateurs who hope to upgrade to a higher license class must also bring a photo copy of their cur-

INDIANA QSO PARTY (INQP)

SPONSORED BY HDXCC THE HOOSIER DX AND CONTEST CLUB

The purpose of the Indiana QSO Party (INQP) is to encourage contact with Indiana amateur radio stations by other Indiana hams and hams worldwide. Stations outside of Indiana work Indiana stations only. Indiana stations work everybody, including other Indiana stations. See the rules for the rest of the details.

INQP 2018 takes place May 5-6-(the first Saturday in May).

The 2018 rules are now available (there are no significant changes from 2017).

Please announce your operating plans on the email reflector (inqp@yahogroups.com). You can see what others have planned on the [Activity Map](#).

Worked All Indiana Award

The INQP is a great time to work on your [Worked All Indiana Award](#). It only takes 60 confirmed counties to earn the initial certificate. Your INQP QSOs count as confirmed QSOs toward your WAI. Just indicate the INQP QSOs on your GCR, and we'll use your submitted log to confirm the QSOs.

Stay in Touch

You are invited to join the INQP reflector. Post your questions about the INQP, make suggestions for next year, or just jump in the general discussion with other participants and the organizers.

State of the Arts

Allen County Amateur Radio Technical Society

P.O. Box 10342, Fort Wayne, IN

ACARTS PRESIDENT'S MESSAGE

As of this writing, we are finally starting to get some spring weather, even though spring has officially been here for over a month. The coming of spring mean that outdoor antenna projects that we have been talking about all winter can be done. Oh, wait. Spring also means that grass cutting, flower planting, and other yard task must be completed before any antenna work is accomplished. Well, maybe thing will slow down later in the summer. Oh, wait. It will be too hot. Maybe antennas in the fall?

Spring also means the start of hamfest season, and especially the Dayton (Xenia) Hamvention. I hope that those of you that are going to the Hamvention this year have good weather, find the bargain of a lifetime, and get to see the friends that you only manage to see once a year at Dayton.

The final spring thing is the ACARTS Spring Banquet, which was held in April. We had a relatively small turnout this year, but those members and guests that did attend the Banquet enjoyed an evening of good food and conversation at Hall's Guesthouse.

The FM VHF/UHF Simplex Contest that has held on the evening of April 7th, had fairly good participation, the simplex frequencies were busy, but there was plenty of room for more stations. Those hams on the air seemed to be enjoying themselves,

so the contest appeared to be a success. Contest logs had to be submitted by May 1st, and the winners of the various categories will be awarded certificates at a future club meeting.

The May ACARTS meeting on the 15th will be a presentation on the digital mode FT8 by Jack, W9GT, and Tom, KU8T. Jack and Tom are among the early users of FT8 in Fort Wayne and have had a lot of experience using the mode. Whether you have not operated FT8 or have been using the mode for a while, this presentation will be of interest to you. I hope to see you there.

73,

Dave Lindquist, W9LKH

President

Joseph Lawrence, K9RFZ, demonstrates satellite communications.

May 15: The May meeting on the 15th will be a presentation on the digital mode FT8 by Jack, W9GT, and Tom, KU8T.

Unless otherwise scheduled, all General meetings are held at 7:00 PM at the Red Cross Center, 1212 E California Rd, Fort Wayne, IN. Board meeting are held at the Salvation Army Facility.

ACARTS APRIL 2018 BOARD MEETING MINUTES

The meeting was called to order by Dave, W9LKH.

Dave announced that the April meeting would be the Spring Banquet, to be held at 7:00 p.m. on April 17th at Hall's Guesthouse. He took reservations from those board members present and added that reservations were slow coming in this year.

Dave stated that the May meeting would be a presentation on the digital mode FT8 by Jack, W9GT.

Dave asked for ideas for the June program. Jim, KB9IH, said that he would look into an antenna program.

A discussion of the participation and activity of the recently held FM VHF/UHF Simplex contest was held. Joseph, K9RFZ, stated that he has received a few log submissions.

Dave, W9LKH, stated that it was time to make reservations for the pavilion at Jefferson Township Park for the club picnic in August. Joseph, K9RFZ, said that he

ACARTS banquet photos by Tom KU8T.

would contact the park manager, as he had all the information from last year.

A brief discussion of the Hamfest status was held,

Several board members arranged to meet at the club storage unit on the 15th to help clean it out so that a smaller unit

can be rented.

No other business was discussed.

The meeting was adjourned at 8:15 p.m.

Submitted by Dave Lindquist, W9LKH

ARRL SUSPENDS REGISTRATION FOR EMERGENCY COMMUNICATIONS COURSE

Registration for "Introduction to Emergency Communications" (EC-001) was suspended on April 30, after ARRL learned that the online platform provider for the course — Connecticut Distance Learning Consortium (CTDLC) — is being dissolved, effective July 1, according to CTDLC's parent, Charter Oak State College.

CTDLC officials cited the fiscal challenges that the Connecticut state college and university system and the state as a whole are facing as the reason for shuttering CTDLC.

As plans are made to move the course content to a new delivery platform, ARRL decided to halt registration. Anyone who

signed up for the EC-001 session that starts on May 30 will receive a refund. ARRL has been developing new EC-001 content and will intensify the process of selecting a new platform to deliver it.

<http://www.arrl.org/news/arrl-suspends-registration-for-emergency-communications-course-as-online-platform-announces-shutdown>

Carl Luetzelschwab, K9LA

Last month's column showed the recent increase in FT8 activity and determined the advantage of FT8 over CW. Although a nominal 7 dB advantage was cited, it was acknowledged that this could easily vary either way by several dB or more depending on your ability to copy weak-signal CW and the fact that real-world decodes of FT8 can be better than what's in the documentation.

I ended last month's column by making two statements relevant to FT8 – one about FT8 on the low bands and one about FT8 on the high bands.

With respect to the low bands, I commented that you should be able to make an FT8 QSO when the FT8 signal is up to 7 dB lower than the CW signal. For example, my nighttime noise on 160-Meters on my inverted-L is typically around -106 dBm in a 250 Hz bandwidth. Knowing (from last month) that I can copy a CW signal at an SNR of -2 dB in 250 Hz says I should be able to copy a -108 dBm signal.

Let's now assume that a CW signal is at -111 dBm. That's an SNR of - 5 dB in the 250 Hz bandwidth, and thus I can't copy this CW signal. But if an FT8 signal is at the

THE EXPLOSION OF FT8 - CONTINUED

same -111 dBm, the result is an SNR of -15 dB in 2500 Hz (the -106 dBm noise in 250 Hz would be -96 dBm in 2500 Hz) – which is above the -19 dB decode capability of FT8. Thus, CW may not get through, but FT8 does.

With respect to the high bands, I commented that you might be able to make a QSO when the MUF (maximum useable frequency) is not high enough for making a CW QSO. Why does the MUF matter? It matters because in the real world the MUF does not have to be as high as the operating frequency to make a QSO. When the MUF is a bit lower than the operating frequency, the QSO can still be completed via what's called an above-the-MUF mode.

This above-the-MUF mode is thought to be some form of scatter, which results in more loss since scatter implies loss. If the additional loss makes the signal strong enough to be readable (whether it's CW or FT8) even though the MUF is a bit below the operating frequency, then the QSO will still be completed.

This above-the-MUF mode is implemented in VOACAP, and thus we can extract the additional loss versus the difference between the operating frequency and the MUF. Knowing this, we can determine that the 7 dB advantage of FT8 says the MUF could be .86 MHz lower than the CW MUF. If we assume the advantage is 12 dB (from the observed decodes of FT8 at -24 SNR), this 12 dB advantage of FT8 says the MUF could be 1.31 MHz lower than the CW MUF. This may not sound like much in terms of frequencies, but it is very important around solar minimum.

So, whether we're on the low bands or

high bands, the nominal 7 dB advantage of FT8 over CW can make it look like an open band for FT8 but a closed band for CW. The mechanism for this is signal level on the low bands, and the mechanism is likely a combination of signal level and MUF on the high bands.

Regardless of how all this works, I expect that FT8 is going to result in a record level of activity on the higher bands during the forthcoming solar minimum period.

SECOND 3Y0Z BOUVET DXPEDITION ATTEMPT UNLIKELY FOR 2018 – 2019 AUSTRAL SEASON

The ill-fated 3Y0Z DXpedition to Bouvet Island, halted earlier this year because of poor weather and engine problems with its transportation vessel, will very likely not be rescheduled for the 2018 – 2019 Austral season, organizers say.

"It has become apparent that the chance of finding a suitable and affordable vessel for the 2018 to 2019 Austral season is becoming less and less likely," the team said in an April 26 news release. "It appears that the very earliest we could mount a second attempt to activate Bouvet would be the 2019 to 2020 season, or possibly beyond."

The 3Y0Z team reports that it has reached "a fair settlement" with transportation contractor DAP and has received a partial reimbursement of its payments. "Our vessel Betanzos is now back in Punta Arenas, and we believe that the container

Continued on Page 7

LOCAL HAMS AND WANE-TV METEOROLOGISTS HELP PROGRAM WEATHER RADIOS

By Jay Farlow, Net Manager, Allen County SKYWARN

Five radio amateurs assisted members of the general public with configuring weather alert radios during a special event last month. The Kroger store at Georgetown Square on Fort Wayne's northeast side hosted the April 16 event, which was organized by WANE TV-15 and the Allen County Office of Homeland Security (ACOHs).

Ham radio participants included Tom Baker, N9TB; Al Burke, WB9SSE; Jay Farlow, W9LW; Steve Haxby, N9MEL; and Howard Pletcher, N9ADS. Mark Frazier, meteorologist in charge of the Northern Indiana National Weather Service Office also participated, as did Lori Mayers, assistant director of ACOHS and WANE broadcast meteorologist Greg Shoup and Adam Solarczyk.

After the three-hour event, WANE chief meteorologist Nicholas Ferreri wrote, "Thanks for gathering such a great group of Fort Wayne area volunteers for Monday's kickoff to WANE Weather Radio Week. I've heard many good reviews

about Monday's event."

Bruce Jones, meteorologist/spokesperson for manufacturer Midland Radio Corporation added, "We appreciate everything SKYWARN/ARRL does to support weather safety both before and during severe weather events. WANE-TV is helping get the word out there and with

partners like you, Lori, and Mark we are building the NOAA Weather Radio audience bigger and bigger every year. We estimate there are 15-20 million weather radio receivers in the US and Canada and it is important that we keep them all operational and properly tuned. So in addition to setting up new radios, thank you for troubleshooting the older models."

Bouvet DXpedition - Continued

with our personal gear and equipment is intact. We will be arranging to transport the container back to the US, arriving in a few months."

The 3Y0Z organizers say they want to offer prorated returns of the DXpedition funds in their account, although this will not happen until after the shipping container has arrived and the DXpedition has paid its bills and knows how much money will remain.

"[T]his is going to be an enormous task, with 137 DX clubs and foundations and 3,700 individual DXers," the an-

nouncement said. "The process will take some time. We ask that you be patient as we complete this."

The process to claim a refund has not yet been established at this point, but the 3Y0Z DXpedition team plans to offer a choice of a prorated refund, or contributors may designate a foundation or club to receive the contribution. Any "unclaimed" refunds will be proportionally distributed to the major contributing foundations, and the 3Y0Z books will be closed.

"We all are unhappy and extremely disappointed that the project was not completed due to a mechanical failure on

our vessel," the announcement said. "This left the captain no choice but to abort the mission for safety reasons. Please accept our team's heartfelt thanks for your outstanding support of this project."

<http://www.arrl.org/news/second-3y0z-bouvet-dxpedition-attempt-unlikely-for-2018-2019-austral-season>

THE FOXHUNT CHRONICLES FOR THE APRIL HUNT

The third foxhunt of 2018 occurred on 8 April, 2018, a beautiful sunny afternoon. Two teams arrived at the starting point at Cobin Memorial Park in anticipation of the hunt beginning at 13:30 hours. The first team included Jim Pliett, K9OMA, Carole Burke, WB9RUS and Al Burke, WB9SSE. The second team included Steve and Linda Nardin W9's SAN & LAN and their grandson Alex.

The fox function was provided by Charles Ward, KC9MUT, Fred Gengnagel, KC9EP, Bob Dean, KC9UHU, and Kevin Loughin, KB9RLW. They chose a little patch of woods just south of Pro Bowl West (on Goshen Rd.) and north of Glen Park, to hide the microfox. It was squirreled into the cleft of a tree branch about six feet off the ground wrapped in camo and almost impossible to see, even when you were a foot or so away from it.

Prior to the foxhunt, Jim, K9OMA had been trying to diagnose the cause of 30-degree error in indicated direction of signal arrival exhibited by the horizontally polarized cubical quad foxhunting antenna mounted on the roof of his van. When he changed to vertical polarization, the bearing error was eliminated so he decided to try vertical polarization for this hunt. That proved to be problematic as it turned out.

The fox started squawking on 146.430 MHz promptly at 13:30 as per the grand plan. Both teams heard it at the starting point but we noticed that our DF antenna could not resolve a single unambiguous direction of arrival. During the first fox transmission we noted three apparent directions of arrival. (We think this was due

to having configured the antenna for vertical polarization).

This being the case we did what any foxhunter would do. We started following the Nardin team as it appeared they were getting good (unambiguous) bearings. We eventually headed west on Lake towards downtown and lost contact with the Nardin's. As we drove through downtown the DF bearings really started getting screwy, but once clear of downtown the bearings then began leading us north on Wells and then west on State, and finally brought us to the southern edge of Glen Park. At this point we had been hearing the microfox itself so we figured we had localized it. So, we dismounted from the van and tromped (that's an official foxhunting term) into Glen Park quickly discovering that the microfox had to be somewhere in the copse of trees between the park and Pro Bowl West. We spent a lot of time amongst the trees before Jim's sharp eyes finally spotted the microfox itself.

Shortly following our discovery, the

Nardin team showed up and proceeded to search for the microfox. Ultimately Alex found the microfox.

After completing the hunt, we decided to zing over to the Five Guys Restaurant in Northcrest Shopping Center for our after-hunt repast. Nobody left that place hungry.

Given the order of finish, the Pliett-Burke team will serve as the quarry for the May foxhunt. Here's hoping a few more foxhunting teams show up for the upcoming contest. That means YOU. It's a lot of fun.

The scores from this month's contest and for the year-to-date are as follows:

Call	Score This Month	Year to Date
WB9RUS	2	9
WB9SSE	2	9
K9OMA	3	11
KA9YYI	0	7
KC9MUT	5	13.5
KC9EZP	5	13.5
KB9RLW	5	9
KC9UHU	5	5
W9SAN	1	4
W9LAN	1	3
Alex	1	2

73's

Monday			Saturday		
8:00 PM	224.780-	Fort Wayne 224 Net	8:00 PM	146.685-	Huntington ARES

1. All times local time. **Any changes or corrections should be submitted to the newsletter editor at AB9ZD (at) ARRL.NET.**

2. On 145.530 @ 1200 baud. Use unconnected converse mode to communicate for a roundtable net setting. Use your "UNPROTO" command or equivalent to set Digi path(s) through the strongest station(s) needed between you and your destination. Only use those that are necessary! Have all your "Monitor" settings on so you can see everyone.

3. 1st and 3rd Thursday, Reflector REF024B.

4. Net starts using BPSK-31 and switches to BPSK-250 after roll call to pass traffic etc. NBEMS suite of software (FLDIGI, FLMSG, and FLAMP) is preferred.

5. Indiana HF Traffic Nets Web Site: <http://www.inarrl.org/index.php/public-service/indiana-nts>
